Relevant Work Experience:	15 years of experience in program management associated with combat systems development
Other Requirements:	8 years of specific experience in program management involving surveillance radars

Position Description:

The selectee will perform as the Deputy Program Manager for a Navy Surveillance Radar Engineering and Logistics contract. In the accomplishment of this task, the selectee will work directly with the Program Manager and staff to:

- Provide leadership and management for radar engineering and logistics activities, ensuring successful accomplishment of tasking and budget execution
- Organize the activities of the Decision Tech team and subcontractors to meet the mission and objectives of the customer's radar program
- Manage the operation of the radar repair facility, ensuring quality and timely products
- Manage subcontractor tasking and activities
- Provide oversight for installation planning and execution
- Provide adequate recruiting and staffing to meet customer requirements
- Provide monthly and quarterly customer status reporting
- Develop budgets and manage financial execution
- Provide adequate facilities for off-base administrative and technical activities
- Ensure customer satisfaction and respond to new customer requirements
- Establish and satisfy short and long-term goals

Experience Requirements:

- Experience with engineering development, testing, analysis, fielding, and logistics support for Navy surveillance radar systems such as:
 - SPS-48
 - SPS-49
 - SPS-67
 - SPS-73
 - BPS-15/16 Submarine radars
 - Dual Band Radar
 - SPY-1
 - SPQ-9B
- Experience with Navy combat system development, testing and fielding
- Experience managing complex radar/combatsystem development programs
- Experience providing program management for Navy surveillance radar or combat system programs
- Experience briefing senior leaders on program plans and status
- Knowledge of shipboard combat system architecture and operational capabilities
- Knowledge of fleet maintenance/modernization processes and organizational responsibilities
- Knowledge of NAVSEA requirements for shipboard installations
- Knowledge of In-Service Engineering (ISE) roles and responsibilities
- Knowledge of NAVSEA Warfare Center roles and responsibilities
- Possess excellent leadership skills and ability to work with team members and subcontractors from various technical and logistics disciplines
- Possess excellent interpersonal and communication skills
