<b>Position:</b>	<b>Field Technician – AN/SPS-73 Radar</b>
<b>Salary Range:</b>	<b>Commensurate with Experience</b>
<b>Location:</b>	<b>Virginia Beach, VA</b>
<b>Position Status:</b>	<b>Full Time</b>
<b>Clearance:</b>	<b>SECRET</b>
<b>Education Level:</b>	<b>Associates Degree in Technical field/Technical Certification or SPS-73 Navy NEC</b>
<b>Relevant Work Experience:</b>	<b>4 years minimum, 8+ years preferred</b>
<b>Other Requirements:</b>	<b>US Citizens only</b>

### Experience Requirements:

- Practical experience maintaining and troubleshooting shipboard radar systems in general (required), AN/SPS-73 radar in particular (highly desired)
- Practical experience with training, preventative maintenance, use of technical documentation, parts support, technical reports and documenting maintenance and troubleshooting activities.
- Familiar with shipboard safety procedures including electrical safety, electrical tag-outs, working aloft procedures, hazardous material handling and use of Personal Protective Equipment (PPE)
- Working knowledge of Change Requests & Engineering Change Proposals.
- Familiar with Navy Logistics Support elements including configuration management, onboard allowance and supply support.
- Familiar with the US Navy installation planning process (desired).
- Interpersonal and communication (oral and written) skills
- Personal computer skills (competent with MS Office applications).

**Position Description:**

The candidate will provide assistance to ships force in maintenance, troubleshooting, and installation of the AN/SPS-73 radar. He/she will document results of maintenance, troubleshooting and problem resolution actions and provide distance support and/or shipboard troubleshooting for fleet CASREPs and requests for technical assistance. In addition, the candidate will perform the following functions:

- Support engineering efforts related to design, testing and analysis of AN/SPS-73 radar upgrades or modifications
- Support technical documentation upgrades or modifications required as a result of system improvements
- Install Field Changes in accordance with Navy shipboard installation processes
- Assist in the development of Ship Installation Drawings (SIDs) and Ship Alteration Records (SAR), which reflect system installation plans and configurations
- Prepare lab and classrooms spaces in support of radar upgrades (new acquisition and legacy systems) and modifications
- Act as liaison with Regional Maintenance Centers to ensure proper processing of installation data and schedule requirements necessary for the unimpeded check-in processing of Alteration Installation Teams (AITs)
- Perform post-installation System Operational Verification Test (SOVT) and On-the-Job Training (OJT)

**We Offer:**

- Competitive salaries and benefits package
- Medical and dental insurance
- 401K
- Tuition Reimbursement
- Flexible Spending Accounts
- Short- and Long-Term Disability
- Vacation time
- Advancement Opportunities
