Position:	Senior Engineer
Salary Range:	\$135,000 - \$150,000
Location:	Washington DC Metro
Position Status:	Full Time
Clearance:	Secret
Education Level:	Minimum Bachelor's Degree in Engineering or Physics
Relevant Work Experience:	Minimum 15 years with BS degree
Other Requirements:	US Citizens only

Position Description:

Decision Technologies, Inc. is looking for an experienced radar engineer with a strong solid state transmitter background to support the Navy's Multi-Mode Radar program and other radar development efforts. Tasking will involve independent analysis of equipment manufacturers' detailed prototype, initial production and final designs. Analysis will be performed on information and data gained from design reviews and technical interchanges, bench and subsystem test, system test, developmental testing, and fielding. Analysis results will be presented to the US Navy customer for consideration and use in project decisions and direction.

Experience Requirements:

- Must possess experience with the development, design and testing of solid state radar transmitters, preferably for US Navy radar systems.
- Must possess strong radar system and combat system engineering knowledge
- Navy engineering program support experience desired
- Strong technical and analytic skills desired
- Strong written and oral communication skills desired
- Working knowledge of MatLab desired

We Offer:

- Competitive Salaries and Benefits Package
- Medical, Dental and Vision Insurance
- 401(K)
- Tuition Reimbursement
- Flexible Spending Accounts
- Short and Long Term Disability
- Vacation Time
- Advancement Opportunities
- Commuting Reimbursement
